

955-35080 CHROME OXIDE GREEN

PRODUCT 955-35080 IS A CONCENTRATED DISPERSION OF A CHROME OXIDE GREEN PIGMENT IN A UNIVERSAL RESIN SOLUTION IN PM ACETATE. THIS HIGHLY COMPATIBLE PRODUCT IS SUITABLE FOR USE IN THESE VEHICLES:

MEDIUM OIL ALKYDS
SHORT OIL ALKYDS
COPOLYMER ALKYDS

POLYESTERS
URETHANES
EPOXIES

VINYLS
ACRYLICS
NITROCELLULOSE

THIS PIGMENT IS THE LARGE CRYSTAL, OPAQUE FORM OF PIGMENT GREEN 17. ITS EXCEPTIONAL DURABILITY IN MASSTONE AND IN TINT HAS LED TO ITS WIDESPREAD USE IN EXTERIOR APPLICATIONS REQUIRING MAXIMUM LIGHTFASTNESS. IN HUE IT CLOSELY RESEMBLES NATURAL GREEN FOLIAGE; LIKE FOLIAGE IT EXHIBITS HIGH REFLECTANCE IN THE INFARED REGION. THIS HIGH IR REFLECTANCE RECOMMENDS THIS PIGMENT FOR STYLING COLORS WHICH "RUN COOL" UNDER INTENSE SUNLIGHT AND ALSO PERMITS ITS USE IN CAMOFLAGE COATINGS.

EACH DISPERSION IN GIBRALTAR'S 955 SERIES IS CONTROLLED TO YIELD LOW VISCOSITY AND EASE OF INCORPORATION RESULTING IN A "MATCHED SET" OF SHADER-FRIENDLY TINTERS AFFORDING IMPRESSIVE VERSATILITY. THE EXCEPTIONAL COMPATIBILITY AND FILM INTEGRITY EXHIBITED BY THIS SERIES OF DISPERSIONS PERMITS MORE LIBERAL DOSAGE LEVELS THAN IS ADVISABLE WITH COMPETITIVE PRODUCTS. THIS ENABLES THE FORMULATOR TO ACHIEVE DEEPER TONES WITHOUT COMPROMISE IN FINAL COATING PROPERTIES.

PRODUCT CONSTANTS:

WEIGHT/GALLON	17.5 LBS
PERCENT NVM	79.7%
PIGMENT GREEN 17	63.0%
V.O.C.	3.6 LBS

DATE: 20 DECEMBER 2001
